

# OPEN COVER INSURANCE

**Our facility provides up to 30 days automatic cover for a wide range of appointments and trade sectors. We focus on our clients' best interests and our service team will support you throughout the appointment; giving advice from the initial call, advising you on the most appropriate cover for the risk and working with you to mitigate the insurance premium costs.**

## **Bespoke**

Our policy wordings are bespoke to Willis. Cover is tailor made for each appointment and adjusted to the needs of the particular case upon receipt of the completed questionnaire. As the appointment develops the insurance requirements change and therefore cover responds immediately to the change of any asset values and you are only ever charged for the cover you use.

## **Flexibility**

Willis understand the need for flexibility on premium payment which is why we only expect payment on case closure for non-trading cases. We also allow 30 days for the completed insurance questionnaire to be completed.

## **Advice**

Our experienced placement team in Reading manages your placement from the first phone call to case closure. The Client Service team is able to conduct site visits, Open Cover training, case clinics, co-ordinate management information and offer any advice where necessary. Our contact details are below. We will always review pre-appointment insurances where applicable and advise on the best insurance solution.

## **In-house Claims Team**

We understand the unique insurance requirements of an Insolvency appointment and this does not always fit within the 'normal' insurance requirements. It is important that claims are viewed in this way which is why we have an experienced in-house Claims team who manage insolvency claims on a day to day basis. They will also review and manage pre-appointment insurance claims.

## **Global**

Willis is a global insurance broker with a wealth of resource and expertise available for our clients. We also have trade sector practice groups who can assist on more specific risks.
